

Posters Exhibition

MultiNano@MBM

Ibrutinib-disabled immune-suppressive microenvironment sensitizes melanoma to PD-1/OX40 immune checkpoint modulators following dendritic cell-targeted nano-vaccines

Helena Florindo

SPEEDY

RT-QuIC for the identification of trace amounts of amyloid beta in CSF samples: coupling with surface-enhanced Raman spectroscopy

Edoardo Bistaffa

Lungcheck

Rapid detection of four biomarkers in sputum using a multiplexed electrochemical device

Estela Carvalho

DiaSyn

Evaluation of brain targeting shuttles in a human in vitro BBB model

Marjolein Heymans

MAGBBRIS

Effect of magnetic nanocapsules and endothelial progenitor cells (EPC) secretome on in vitro model of human blood-brain barrier (BBB)

Rodrigo Loiola

NanoTech4ALS

Manganese alginate hydrogels as a reliable biomaterials for intratechal stem cell delivery

Lukasz Kalkowski

AMI

Graphene-based Electrolyte-gated Transistors: A versatile platform for bioelectronics

Rafael Furlan de Oliveira

ARROWNANO

Nanoparticles for Bronchiolitis Obliterans syndrome: a new promise local therapy

Laura Pandolfi

NANOMIR

Gold nanoparticles for the treatment and sensing of duchenne muscular dystrophy detection

Milán Rois Paula

Target4Cancer

Development of polymeric micelles targeted against Colon Cancer Stem Cells

Petra Gener

INNOCENT

Innovative Nanopharmaceuticals: Targeting Breast Cancer Stem Cells by a Novel Combination of Epigenetic and Anticancer

Bozena Smolkova

FluNanoAir

Formulation and biodistribution of functionalized micelles

Myriam Lamrayah

NanoBit

Nanoscintillator-porphyrin Complex for Bimodal RadioPhotoDynamic Therapy

Andrius Kleinauskas
